

Vince Parliament

My husband was diagnosed on December 11th, 2007 and passed away on December 26th, 2007. He had the symptoms in late September that are typical of this dreaded disease but thought he had gall bladder problems. Vince had never been sick in his life and did not smoke or drink (occasionally). He was a very athletic person and ate healthily. His job was repairing automobiles and farm machinery which leads me to believe his time spent around pesticides and gasoline based products is what caused his pancreatic cancer.

In honour of what would have been Vince's 60th birthday (Sept. 26th 2009), my family and I are hosting a RETRO MOVIE NIGHT at our home for family and friends. We are showing movies from 1949, the year my husband was born, and having food from a concession stand. We will also run a silent auction. All monies donated will be sent to you for pancreatic cancer research.

We hope to do this as a yearly fundraiser in my husband's memory.
